Dear Western Digital Hiring Manager,

As a computer engineer who has flourished in the intersection of hardware, software, and design, I would love for the opportunity to work and learn at Western Digital. I am applying for the RAMP Engineering Intern for the Summer of 2019 which I found through the Georgia Tech Spring ECE Career Fair.

I have an excellent understanding of computer hardware architecture from classwork on top of the programming knowledge I've listed on my resume. During my internship at Autodesk, I worked on a web application with a large backend system and became familiar with networking and creating test environments in a team-based scrim environment. I also communicated with the UX team to help influence my end project. As an intern, I can offer a competent software engineer with knowledge of computer hardware and a love of multidisciplinary teamwork.

I really enjoy creating communities and volunteering as an intern. At Autodesk I organized a Korean Fried Chicken going away dinner for all the interns (20+ interns) and cooked for the whole group in Autodesk's test kitchen which I had to receive fire safety training and food safety training for. I did volunteer work for unprivileged LGBTQIA+ youth (Maven Youth Program) and helped run workshops at Autodesk. So if there is a volunteer organization within Western Digital, I'd love to be a part or even help organize one.

I'm very excited for the opportunity to learn and I look forward to hearing back from you! Feel free to contact me by email or phone.

Best regards,
Matthew Lim
